ABOUT US

EVERYTHING YOU NEED TO KNOW ABOUT EUROPE'S MOST INNOVATIVE HEADSET MANUFACTURER.

Axtel is a **European based global brand** that specializes in the manufacturing of professional headsets. We deliver communication solutions particularly geared towards call centers and office environments. Our clients' needs and expectations are the number one priority we consider during the initial design phase of our headsets. We aim to create products that support our clients in the most effective and efficient way possible. We focus on bringing more authenticity to your business conversations through the use of advanced sound technology. Not only are we current on all leading technological trends on the market, but we also strive to exceed global headset quality standards. Because our ultimate goal is to create products that add true value to a business.

Sound quality, reliability and maximum comfort, all achieved through ergonomic design, are the main features of Axtel headsets. Having created **an extensive product portfolio** for enterprises worldwide, Axtel has become a trusted business partner for the entirety of its client base.

5 REASONS

COMPANIES OPT FOR AXTEL

EXTENSIVE EXPERIENCE

Axtel Headsets has just recently celebrated its 16 year anniversary and continues to strive for excellency in their ongoing efforts of establishing themselves as a globally recognized brand, as well as a leader within its industry.

EUROPEANS STANDARDS

Our products are manufactured in Europe, and we place great emphasis on closely monitoring the production process to ensure the highest possible quality. Not only does this include strict quality control at every stage of production, but we also make continual efforts to improve our products rapidly as well as in great detail. That is why Axtel products meet the highest quality of standards applicable to various international markets.

HIGH QUALITY

Our unwavering commitment to quality is vital in all that we do. We make an active effort to maintain high-quality standards throughout the design and manufacture process. We do so in the most efficient way possible, in order to ensure our product is affordable for a vast amount of consumers and business professionals around the globe.

COLLABORATION

The collective objective of Axtel has always been to provide reliable products that fully support each user in the conducting of their business affairs. That's why we are proud to be certified by, as well as compatible with, the solutions of the most well-renowned brands within the telecom industry.

OUR PARTNERSHIPS

Axtel works alongside strategic alliance partners in order to ensure that our products are easy to deploy and fully compatible with the great majority of their solutions.

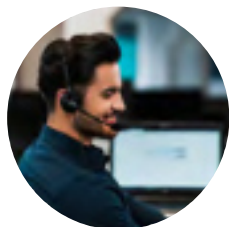

CHOOSING A HEADSET

WHAT TO CONSIDER?

1. Compatibility

Axtel headsets work well with a very wide range of telecommunication devices and solutions. Please contact us to check whether your existing communication solutions are compatible with our products. Compatibility includes the following hardware:

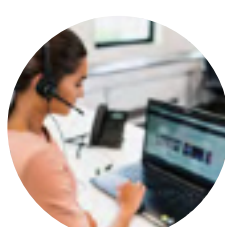

Computers

Mobile Devices

Deskphones

Other Devices

2. Type of Environment and Ambient Sound Level

Ambient conditions are important when selecting the type of headsets for your organization. Proper noise cancellation, sound technology and monaural or binaural headsets play an important role in the experience of your users.

3. Individual preferences

Each business has unique needs defined by but not limited to:

- Need of cost-effective solution
- Search for robust tool dedicated to everyday use
- Frequency of conversations on the phone and softphone
- Frequently changing workspaces
- Desire of highest sound quality and clear communication
- Appreciation for comfort while working
- Preference for modern design

ELITE SERIES

Exclusive sound quality

ELITE HDVOICE

Professional headset

- Crystal clear voice
- Excellent audibility
- Advanced noise cancellation
- Microphone with noise cancellation
- Acoustic Protection Technology
- Made of the highest quality materials
- Extremely durable construction
- Soft, leatherette ear cushions
- Adjustable headband
- Flexible microphone boom
- Innovative IP electronics
- Elegant and modern design
- Compatible with desk phone, softphone and smartphone
- QD plug
- Available in mono and duo versions

Elite HDVoice Series

The Elite HDVoice Series headsets combine advanced sound technology with an original design in one interface. The Elite HDVoice Series is designed for the most demanding users and guarantee clear and flawless communication for both sides. All headsets in the Axtel Elite series provide crystal clear sound quality for excellent audibility.

The microphones are equipped with advanced noise cancellation making the Elite series headsets perfect for even the loudest contact centre environments. Consultants and clients can fully focus on their conversation in a way that comes as close to face-to-face interaction as possible.

Furthermore, these professional headsets further offer intuitive USB connections and Plug&Play function. The exceptional construction of the Elite series headsets combines a unique design with top-quality, scratch-re-sistant materials that meet the needs of even the most demanding clients. They are equipped with adjustable headbands and soft, leatherette ear cushions for extra comfort. Designed with exceptional attention to detail and available in mono and duo variants, the entire product range impresses with its modern design acting as a tasteful solution in business.

Prime Series

Improve your efficiency with high-quality communication. The Axtel PRIME headsets use digital sound processing (DSP) and Acoustic Protection technology for HD quality sound and excellent noise-cancellation for any environment. We know how loud open-space offices can be, so we designed a headset that delivers a completely new level of business communication. Our ergonomic solutions ensure a high level of comfort why you carry out your daily tasks. The light, flexible structure, soft and movable earpieces that adjust to the shape of your ear, smooth moderation and the functional USB remote control deliver the highest level of comfort at work. It allows users to stay focused even after many hours of continuous use. All PRIME headsets are compatible with IP phones, so all users can take advantage of wideband and other high-quality sound features of their modern devices.

For users who need to carry out various tasks during calls, the series also offers wireless options that allow for unrestrained communication and mobility within a range of 200 meters. These wireless headsets have a battery life of up to 10 hours without charging and offer efficient integration with computers, desk phones and mobile phones. Ease of use is guaranteed through intuitive controls on the docking station and the headband, allowing for answering and declining calls and efficient management in every situation by switching between three communication channels.

Axtel PRIME is dedicated to all companies that value effective communication and is a perfect fit for all types of workplaces.

PERSONALIZE

Create personalized Prime HD headsets

Our goal at Axtel Headsets is to connect people around the world using our products. As the products are designed with companies and their needs in mind, we would like every Axtel headset to make our clients' jobs easier.

Engage with colors

Over the years, we've learned that seemingly subtle changes in the work environment can have a huge impact. A friendly ambience translates into greater engagement from your people, which is why Axtel encourages you to personalize our products by playing with color. By changing the color of the O-ring, you can create a headset that visually underlines the individual character of your company.

Develop and motivate

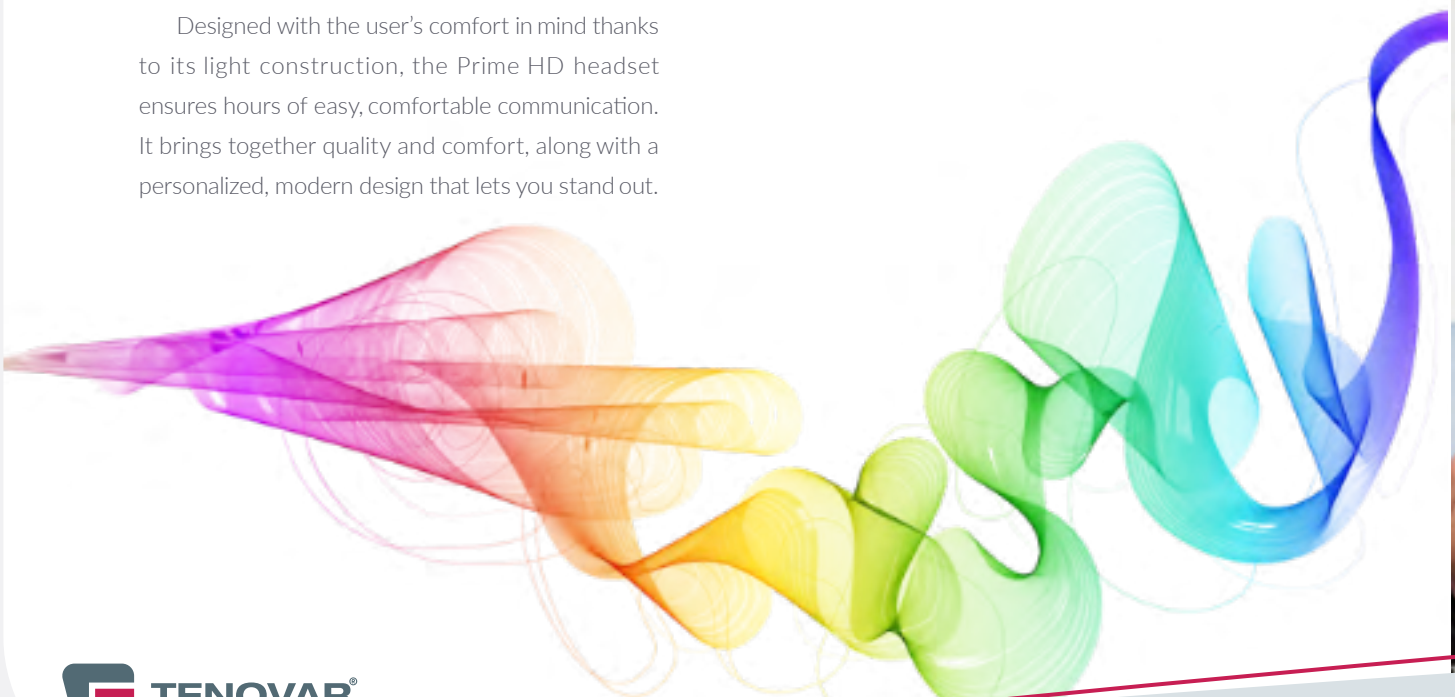

Each color has its own strengths, and a different effect on our feelings and behavior. Color can affect our motivation, the way we approach tasks, our creativity and effectiveness. Choose the color that's right for the needs of your team.

Quality without compromise

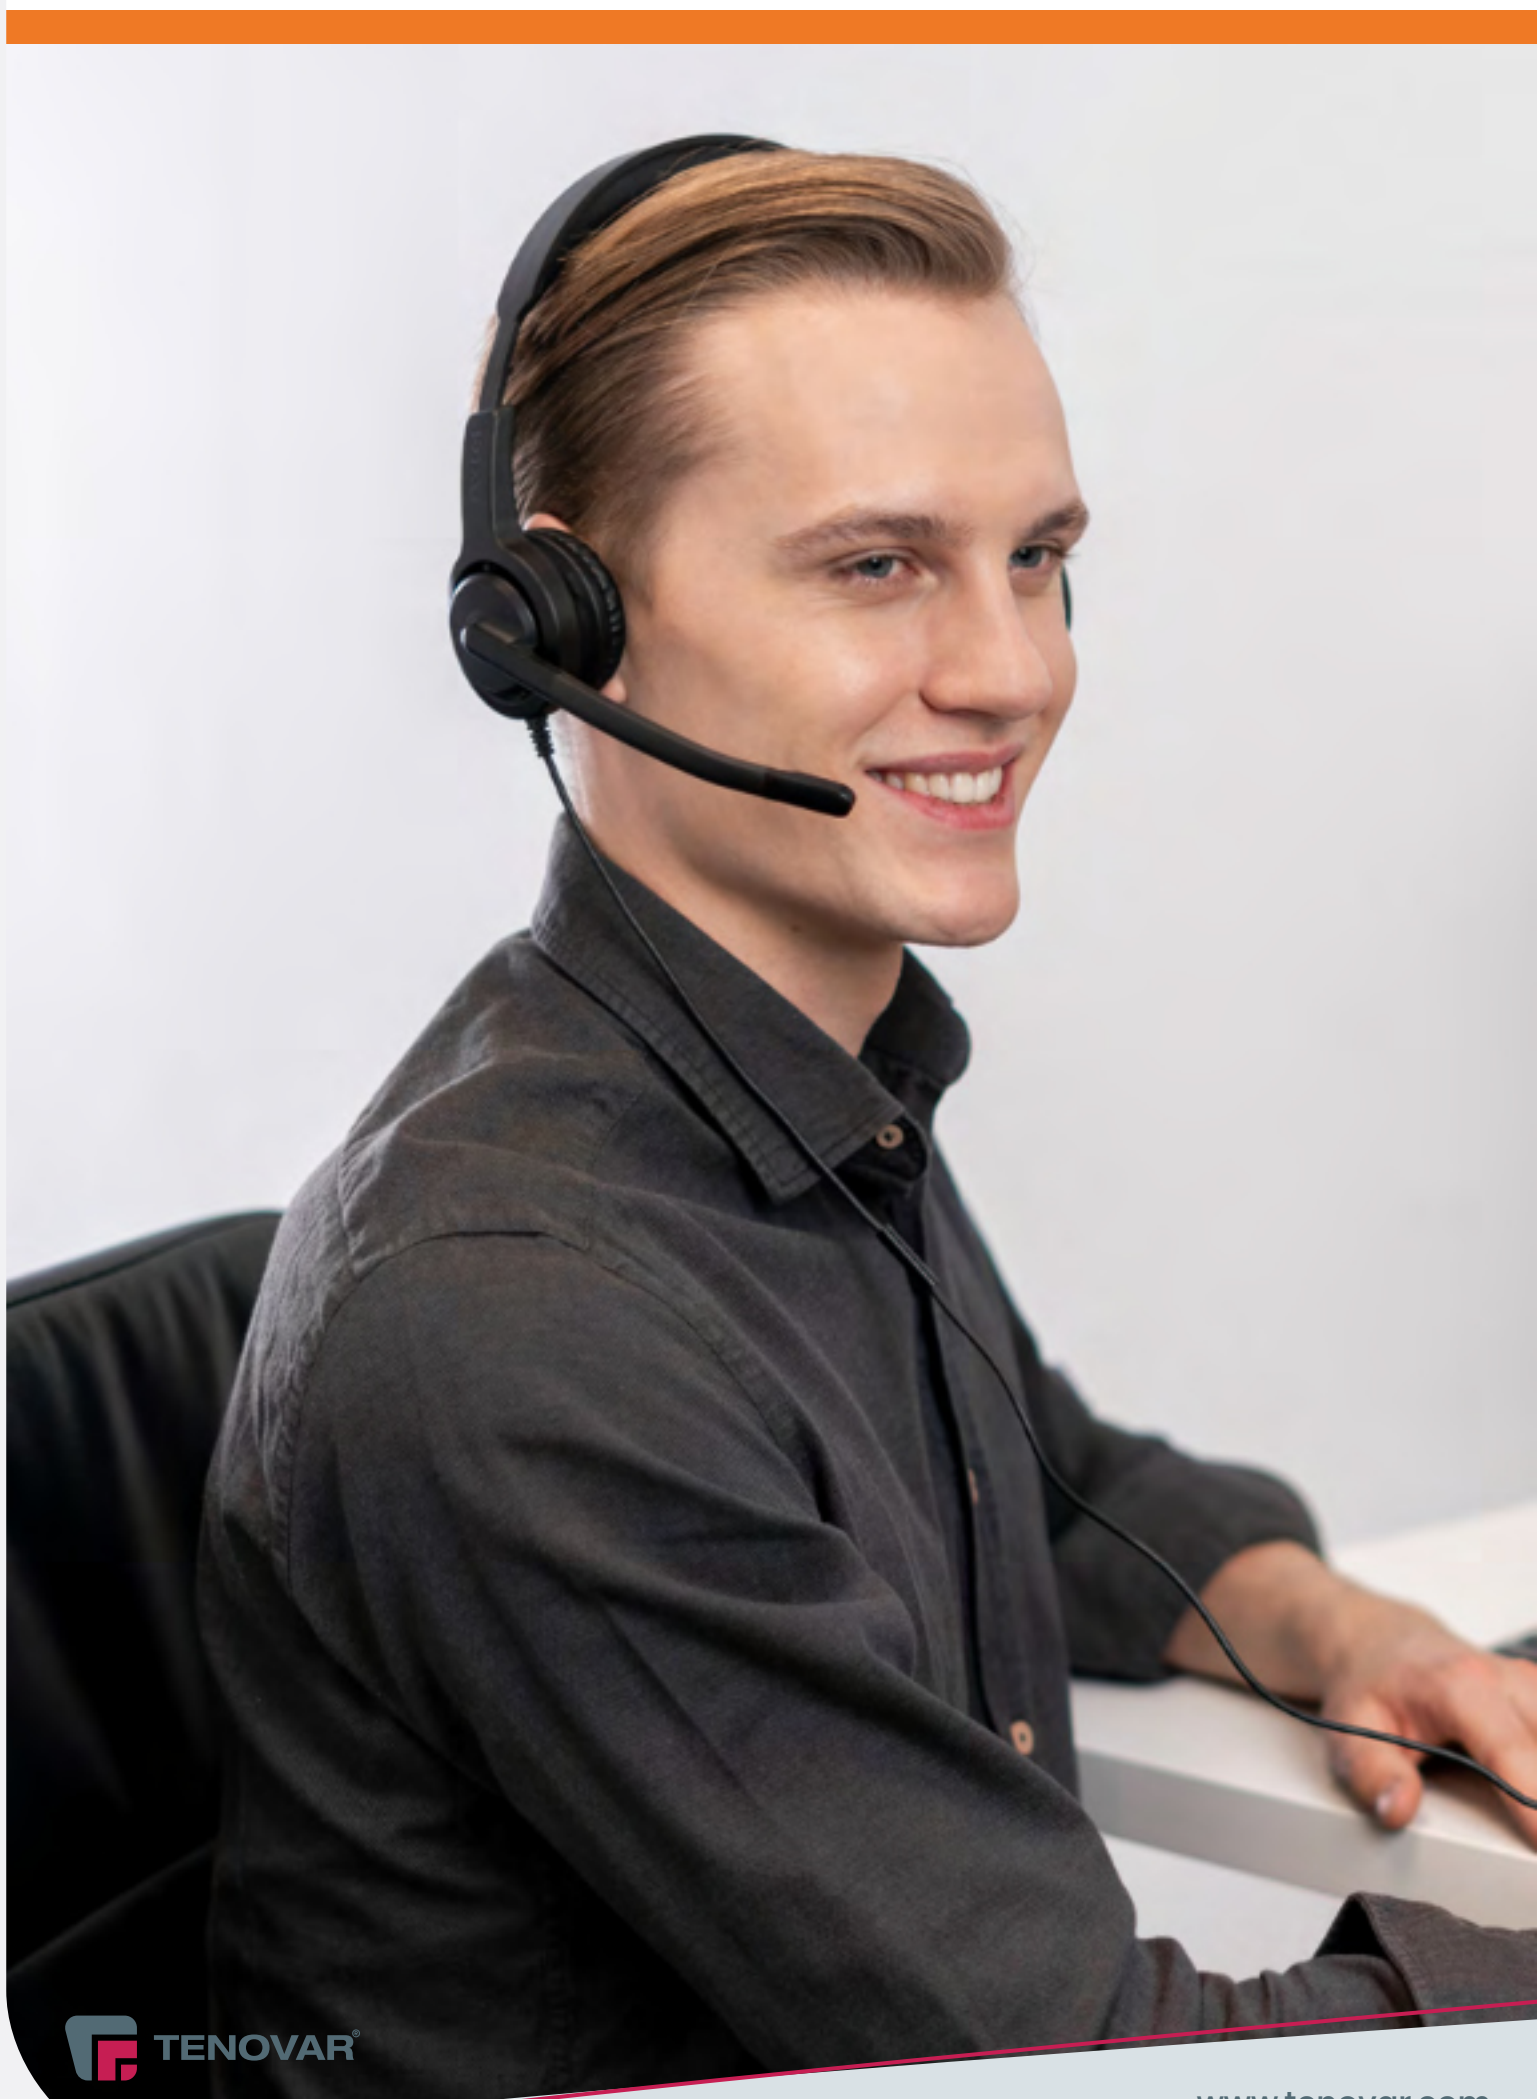

Designed with the user's comfort in mind thanks to its light construction, the Prime HD headset ensures hours of easy, comfortable communication. It brings together quality and comfort, along with a personalized, modern design that lets you stand out.

Play with color

As a producer of professional headsets, Axtel Headsets is aware of the great possibilities that small changes can deliver. That is why we offer 15 possible colors for your product's O-ring. Use the creator to see what your headset will look like.

VOICE SERIES

Crystal Clear Audio in Every Environment

VOICE

VOICE 28 HD NC

VOICE Series

The Axtel VOICE series headsets are professional, high-quality business headsets that work in even the most challenging and loudest offices. Each model offers clear HD sound quality in stereo for calls, music and multimedia in dynamic environments. The wear comfort of Axtel VOICE ensures the productivity of staff who use the devices for extended periods of time.

The portfolio of Axtel VOICE is designed to offer a headset for every possible use case in business, with a connection type for every environment:

Axtel VOICE USB – Whether based on Skype for Business or other leading solutions, effective business communications require quality audio, versatility and end-user comfort. The USB plug allows for easy connection with various devices and enables users to make use of all the advanced functionality of their softphones.

Axtel VOICE QD – For easy connection with various IP desk phones and other dedicated communication devices, the universal QD plug of Axtel VOICE QD enables users to make use of all the advanced functionality of their desk phones.

Axtel VOICE PC – Axtel VOICE PC is designed for every environment, from business premises to home offices and bustling coffee shops. The 3.5mm audio jack allows for easy connection with PC's, smartphones and tablets, and enables users to make use of all the advanced functionality of their communication application in every setting.

Axtel VOICE UC – For extra management, Axtel VOICE UC headsets offer additional control and visual features, including lighted buttons for user feedback and a busy light on the microphone, signaling calls ongoing.
